

# Remuneration report 2022

This remuneration report has been designed according to the requirements of S.139b of the Danish Companies Act and also covers the requirements of the annual reporting of remuneration under financial legislation. For previous years, similar information is available at Jyske Bank's website - for the period up to 2018 in the reports on remuneration and subsequently in the remuneration reports.

## Principles governing remuneration

The purpose of Jyske Bank's remuneration policy is to reward value-creating, competent and responsible conduct as well as to support productivity and job satisfaction. It is also important for the Jyske Bank Group and a statutory requirement of the Danish Financial Business Act that the remuneration policy promotes and is in line with sound and efficient risk management and that it prevents conflicts of interest and strengthens the obligation to act in the best interest of the clients. Finally, the remuneration policy must ensure proper focus on sustainability and corporate social responsibility and equal pay for equal work. The remuneration policy adopted applies to all companies of the Jyske Bank Group.

It has always been part of Jyske Bank's remuneration policy not to offer actual commission or bonus schemes with variable remuneration, measured schematically according to results. Share-based remuneration only exists in the form of general schemes comprising all employees.

Since 2017, all permanent employees of the Jyske Bank Group in Denmark have received offers of participating in an employee share scheme according to the provisions of S.7P of the Danish Tax Assessment Act that were introduced in 2016. The scheme is granted for one year at a time, and since 2019 the Supervisory Board decided to repeat the offer, now with a possibility of opting for up to 20% compared with previously 10% of the remuneration paid out as employee shares. This has also been adopted for 2023. Employees in Germany are offered a less comprehensive scheme according to German rules.

All remuneration is determined on the basis of a comprehensive assessment of four parameters:

- job profile
- results
- efforts
- competences.

As a consequence of the provisions of the Danish Financial Business Act, the Supervisory Board has adopted the Jyske Bank Group's remuneration policy, and in accordance with the act the policy must be submitted to the members in general meeting for approval when changes are made. The remuneration policy must be approved at least every third year, according to the Group's internal business procedures and the stipulations of the Danish Companies Act. The requirement of adjustments of the remuneration policy to the development of the Group is monitored on an ongoing basis by the Group's HR division which with the necessary internal and external assistance prepares proposals for amendments. After consideration by the Group Executive Board proposals for adjustments are presented to the Remuneration Committee of the Supervisory Board before the proposed amendments are submitted to members in general meeting for adoption.

The Supervisory Board has established a Remuneration Committee consisting of the chairman and the deputy chairman of the Supervisory Board and one of the board members elected by the employees. The committee is in charge of the preparatory work behind the decisions by the Supervisory Board regarding remuneration, including remuneration policy, yet proposals for adjustment of remuneration of the Supervisory Board and the Shareholders' Representatives are submitted by the Nomination Committee. Moreover, the Remuneration Committee is responsible for controlling compliance with the policy including that the remuneration of the Supervisory Board and the Shareholders' Representatives takes place according to the rates determined by members in general meeting.

In 2022, the Remuneration Committee of the Supervisory Board held two meetings. The Remuneration Committee has examined the remuneration policy and adjusted the policy in relation to integration of sustainability risks cf. Article 5 of the Sustainable Finance Disclosure Regulation. In addition, the committee has controlled the execution of the remuneration policy, including separate control of the remuneration of the senior management and other material risk takers.

### **Equal pay**

As laid down by law, gender-segregated wage statistics for the companies of the Group that fulfil the criteria have again this year been prepared. The wage statistics have been presented to Finansforbundet Jyske Bank Kreds (Union for Employees in Finance). As opposed to all previous years since the commencement of the law, it has in 2022, as an exception, been decided not to set up a task group with the purpose of making a detailed analysis of the statistics. This was decided on the basis of previous years' conclusions that Jyske Bank generally offers equal pay for equal work. Instead the focus of attention has been on work with more structural differences as reflected by equal-pay statistics.

### **Variable remuneration**

Due to a principal opt-out of commission and bonus schemes in the Group, variable remuneration comprises payments in accordance with the remuneration policy in the form of one-off allowance and remuneration in connection with resignation or retirement.

In 2022, one-off allowances totalling DKK 5,883,000 distributed on 186 employees in the Group were paid out (the figure is exclusive of employees from the former Handelsbanken). The amount is inclusive of pension to employees who have not been appointed as material risk-takers. None of the allowances exceed DKK 100,000 which is the maximum amount for the allocation of one-off allowance

## **Report on the remuneration of the Supervisory Board, Executive Board and material risk-takers in 2022**

According to the relevant statutory provisions, the Executive Board recommends to the Supervisory Board the employees whose activities have a material impact on the Group's risk profile. When appointing these employees, the Executive Board and the Supervisory Board find it of great importance both to include all

significant risk-takers, including employees split between the companies and to define a clear and consistent demarcation that will minimise the uncertainty as to which employees belong to the group of significant risk-takers.

The qualitative criteria for the appointment of material risk-takers apart from the Group Supervisory Board and the Group Executive Board are currently:

- Members of the Group's top management (currently the Jyske Bank Group Management).
- Heads of division and department in the Group's trading functions (currently Capital Markets).
- Employees working with the management of the Jyske Bank Group's balance sheet and positions (currently all permanent staff of Group Treasury and of Group Treasury, Realkredit).
- Directors as well as heads of division and department being responsible for important control activities in relation to the Group's risk management (currently the head of Compliance, the head of Internal Audit and all heads of division and department as well as the Directors of Risk Management).
- Employees who may expose the Group to material credit risks (currently employees with powers of granting credits of DKK 150 m or more and also employees responsible for control and final preparation of credit recommendations for exposures above DKK 150 m).
- Employees with managerial responsibility in material business units reporting directly to the head of the unit (currently this applies to the units Personal Clients, Corporate Clients and Jyske Finans)
- Supervisory Board, Management Board and employees with managerial responsibility, referring to the Executive Board of Jyske Realkredit.
- Supervisory Board, Management Board and employees with managerial responsibility, referring to the Management Board of Jyske Invest Fund Management.
- Supervisory Board, Management Board and the risk officers of Handelsinvest Investeringsforvaltning.
- Employees with managerial responsibility for the management of outsourcing schemes in Jyske Bank and Jyske Realkredit, respectively.
- Employees with managerial responsibility for the prevention of money laundering and the financing of terrorism.
- Managers who according to the Group's business procedures for Product Approval are authorised to approve or veto introduction of new products.

### **Breakdown of remuneration among the Supervisory Board, Executive Board and other material risk-takers**

The breakdown by Supervisory Board, Executive Board and other material risk-takers of earned and paid out fixed and variable remuneration in 2022 appears from the table below (Group numbers):

	Supervisory Board	Executive Board	Material risk-takers	Total
<b>Number of recipients, fixed remuneration</b>	10	4	127	141
<b>Number of recipients, variable remuneration</b>	0	0	19	19
<b>Earned fixed remuneration in the financial year (DKK '000)</b>	6,952	37,627	153,750	198,329
<b>Earned variable remuneration in the financial year (DKK '000)</b>	0	0	3,807	3,807

The calculation of pay includes all fees, fixed pay, pay supplements, bonuses, pension contributions as well as taxable goods and working tools. For the Executive Board provisions for retirement remuneration have been included. Total variable remuneration consists of one-off allowance allocated according to sections 9-10 of

the remuneration policy and remuneration – i.e. resignation and retirement remuneration, cf. section 11 of the remuneration policy.

The number of employees etc. in the table above comprise material risk-takers who joined or resigned in the course of the year. The actual number at year-end covered nine members of the Supervisory Board, four directors and 111 material risk-takers, respectively.

No variable remuneration in excess of the maximum limit of DKK 100,000 for one-off allowances was earned or paid out to these persons. In 2022, a total of 16 other material risk-takers received a one-off allowance. In 2022, neither members of the Supervisory Board nor the Executive Board received any variable pay. No sign-on bonuses were paid during the financial year. Included in the variable remuneration stated, severance benefits/retirement compensation were paid to 4 material risk-takers over the financial year. The benefits/compensation are within the framework of severance benefits/retirement compensation as laid down in statutory provisions.

In the financial year 2022, four persons were remunerated by between EUR 1 m and EUR 1.5 m.

### Remuneration broken down by business area for material risk-takers

Within the various business areas, the Supervisory Board, the Executive Board as well as material risk-takers in 2022 earned and had the following amounts paid out (Group figures):

	Number	Total remuneration (DKK '000)	Fixed remuneration (DKK '000)	Variable remuneration (DKK '000)
<b>Supervisory Board</b>	10	6,952	6,952	0
<b>Executive Board</b>	4	37,627	37,627	0
<b>Investment</b>	11	16,606	16,561	45
<b>Retail</b>	51	64,357	61,856	2,501
<b>Asset Management</b>	17	16,898	16,838	60
<b>Others</b>	48	59,696	58,495	1,201
<b>Total</b>	141	202,136	198,329	3,807

The same definitions of remuneration, etc. as in the preceding table have been used. The category "Other" consists of employees employed in staff and control functions.

### Individual remuneration of the Supervisory Board and Executive Board, development in average remuneration and consolidated result

There were no changes to the remuneration of the Supervisory Board in 2022. Members of the Supervisory Board only receive fixed remuneration in relation to its directorships and committee seats.

The total remuneration to the four members of the Executive Board rose by almost DKK 0.9 m in 2022. This is primarily due to the contractual remuneration adjustment corresponding to the total increase prescribed by the collection agreement according to Jyske Bank's group collective agreement. It is still the case that the Executive Board of Jyske Bank like the employees does not, apart from the fixed salary, have any form of incentive schemes such as options, bonus schemes, performance-related bonuses etc.

As from 2017, provision for retirement remuneration is included in the total remuneration of the Executive Board calculated, and in connection with a remuneration adjustment the provision for this year was raised, which is the background behind the particularly high total remuneration in 2017. For Sven A. Blomberg remuneration paid in connection with retirement is included in 2017.

Information on the most material contents of the retention and severance schemes appears from note 12 in the individual financial statements.
